FOR IMMEDIATE RELEASE

Xaloy Announces Acquisition of Maxi Melt

AUSTINTOWN, Ohio – April 14, 2026 – Xaloy, a global leader in the design and manufacture of polymer processing solutions, today announced the acquisition of Maxi Melt, an Italy-based supplier of plasticizing components for extrusion and injection molding applications.

The acquisition expands Xaloy's capabilities in plasticizing components and strengthens its position with customers through an enhanced combination of engineering, materials, and application expertise. Maxi Melt has built a well-established European footprint, supported by close customer relationships, technical capability, and a highly responsive commercial model.

"Maxi Melt has developed a strong presence in Europe through its customer focus and application expertise," said Kamal Tiwari, CEO of Xaloy. "This combination allows us to broaden our capabilities and better support customers with a more complete range of solutions."

"This is an important step for Maxi Melt," said Renzo Cavazza, Managing Director of Maxi Melt. "Xaloy brings scale, technical resources, and manufacturing capability that will enhance what we are able to offer. We will continue to operate with the same focus on our customers while expanding our capabilities."

Maxi Melt will continue to operate under its existing brand, maintaining its team, customer relationships, and operating approach. The combined organization will focus on leveraging complementary strengths to expand capabilities and support long-term growth.

About Xaloy:

Xaloy is a global provider of polymer processing solutions used in extrusion and injection molding applications. With a long history of materials innovation and engineering expertise, Xaloy serves customers across a wide range of polymer processing industries.

About Maxi Melt:

Maxi Melt is an Italy-based supplier of plasticizing components with a strong presence across Europe, known for its engineering capability, responsiveness, and customer-focused approach in extrusion and injection molding applications.
